Summary

Final-year B.Tech CSE student (graduating 2027) seeking SDE / Full-Stack Developer roles. Built a production SaaS (**PrintOS**) featuring a custom Go print-agent and FIFO job-queue system handling concurrent orders at **100% accuracy** – backed by a **1750+ LeetCode rating**, **2x Hackathon Winner** title, and **AINCAT AIR 3842** among 4.7L+ participants (top 0.8%).

Projects

PrintOS | Cloud-Based Print Automation SaaS for Print Shops | [Live](#)

June 2026 – Present

- Built a full-stack SaaS platform automating print-shop workflows – replacing manual WhatsApp-based ordering with a QR-scan-to-print pipeline across **Shop Owner** and **Student** roles.
- Engineered a FIFO job-queue system enforced at the API layer using PostgreSQL, guaranteeing **100%** order-accurate physical-to-digital job matching under concurrent multi-user load.
- Built a server-side PDF-merge pipeline that combines multi-file student uploads into a single print job, cutting manual per-file print actions by up to **90%** for batch submissions.
- Developed a lightweight Go-based print agent – a single compiled binary with zero runtime dependencies – enabling automated printing on legacy USB and network printers with **sub-3-second** real-time job synchronization via Socket.io.

Technologies Used: Next.js, TypeScript, Node.js, Express.js, PostgreSQL (Neon), Go, Socket.io, pdf-lib, Backblaze B2, JWT

Syncora | [Live](#)

Mar 2026 – May 2026

- Built a full-stack AI-powered project management platform integrating **Gemini AI** to auto-generate Kanban tasks from project goals, reducing sprint planning time by **70%**.
- Designed and developed **12+ RESTful APIs** using Node.js, Express, and MongoDB with JWT-based authentication and role-based access control, achieving average response times **under 200ms**.
- Implemented API rate-limiting (**100 requests/15 min**) and Helmet.js security headers to mitigate DDoS and brute-force attacks, hardening the application before production deployment.
- Architected real-time task synchronization across concurrent users using WebSockets in a React + Vite frontend, and deployed the platform on Render with **99.9% uptime** following CI/CD best practices for zero-downtime releases.

Technologies Used: React.js, Node.js, Express.js, MongoDB, Gemini AI API, Vite, Helmet.js, JWT, WebSockets, REST APIs

Experience

Full Stack Developer Intern – Pest Control Wallah Pvt. Ltd.

Jun 2026 – Jul 2026

- Shipped multiple feature modules to the company's live customer-facing platform using the MERN stack.
- Integrated backend REST APIs with React components for reliable, low-latency client-server data flow.
- Followed team Git workflow – feature branches, pull requests, and code review before merging to production.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, GSAP, Zustand, React Router

Backend: Node.js, Express.js, REST APIs, JWT, Passport.js, WebSocket

Databases: MongoDB, PostgreSQL, MySQL

Tools: Git, GitHub, Postman, Vercel, Render

Concepts: DSA, OOP, OS, DBMS, Computer Networks, LLD, System Design

Education

B.Tech, Computer Science & Engineering – IMS Engineering College, Ghaziabad

Sep 2023 – Present

CGPA: **8.4 / 10**

Class XII – K.M.S.V.M. Inter College, Garhmukteshwar, Hapur

Mar 2021 – Mar 2022

Percentage: **82.88%**

Achievements & Competitive Programming

- Solved **900+ DSA problems** across LeetCode, Codeforces & GeeksforGeeks – max LeetCode rating **1750**.
- **2x Hackathon Winner** – Build With Gemini & WEB WIZARDS 2.0 – built and shipped a full-stack app in under 24 hours.
- **AINCAT 2026:** AIR **3842** among **4.7 lakh+** participants – top 0.8 percentile nationally.

Trainings & Learning

- **AWS Solutions Architecture Job Simulation** – Amazon Web Services × Forage
- **AWS AI Practitioner Learning Plan** – AWS Training & Certification
